Best of all - our customers care  
as much as us

pytt

# PYTT LIVING

PYTT became a reality in 2015, as a result of our love for design, interior, and the never-ending challenge of creating something new.

PYTT originates from the Danish word “pyt”, which means never mind: Never mind that it may seem a bit chaotic to begin with, never mind what other people may think – at PYTT we take the leap and dare to succeed. No more same old. Sometimes you have to take a leap into the dark if you want to create something new, something special. This is our approach to our products, which are created from classic and quality conscious design that wants to be seen and appreciated.

At PYTT, we create functional, minimalistic and detail-orientated interior design products. Scandinavian design is part of many homes, because people love its pure and simple expression, which can easily be included in modern homes, combined with new trends and old finds. At PYTT, this is part of our DNA.

But life does not stand still. So we have evolved and created a new series of products, which are a unique and inspiring mix, incorporating timeless and contemporary design. Acting in a responsible way is hugely important to us – environmentally, ethically and financially.

This personal ethos is consistent in our value-chain, from our choice of materials, to a responsible production method that is based on European standards, and our focus on generating as little waste as possible. We believe you can feel it when you hold a PYTT product in your hands.

THE FILLING IN SEVERAL  
OF OUR PILLOWS IS MADE  
OF RECYCLED MATERIALS

94 X 14,5 CM

## RELOVED BY PYTT

We have always produced products containing reusable materials, and we will continue doing that in the future.

Over 70 percent of our assortment contains reusable materials – that includes covers and filling. All of the products shown contain recycled materials and are therefore also included in the Reloved concept.

All REloved products are all marked with a REuse, REDuce, REcycle logo.

RE USE  
RE DUCE

## HIGH QUALITY PRODUCTS

We put great value into the quality of our products and consideration for our environment. All our products are produced in Europe and manufactured under applicable rules. Some of our suppliers are self-sufficient with solar and wind energy. We do not compromise with the quality of our products, and for this reason the cotton we use to make the bed linen and head boards are OEKO-TEX® certified.

### WING BLUE BED LINEN

## WHEN NOISE TURNS BEAUTIFUL

Acoustics has a huge impact on how we experience a room and how we feel being in it. A room with bad acoustic seems irritating and tiring on us. PYTT Living has developed a series of acoustic panels, Acoustic 4 and Acoustic 6, which are both aesthetic and practical, which helps you to regulate noise in a room.

## NEW MATERIALS

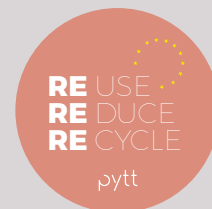

*Every year, millions of plastic bottles end up in the nature and destroy our environment.*

The new range of PYTT's textiles responds to the plastic problem of the world by producing textiles of used plastic bottles. PYTT's selection already encompasses textiles, which are produced of recycled cotton, which is branded with "REloved By PYTT" and "REuse – REDuce – REcycle". PYTT now takes a further step and there is more to come.

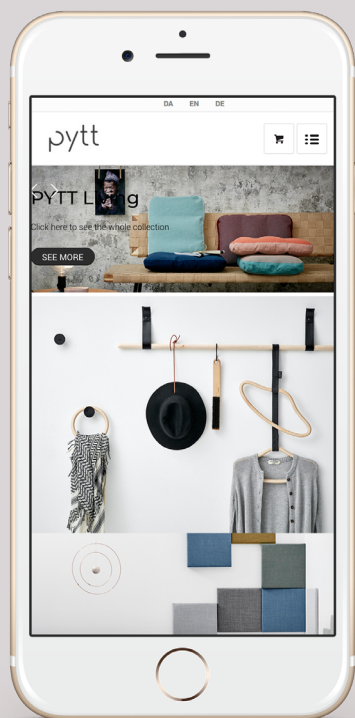

# RELOVED BY PYTT

At PYTT Living we care for the environment and the recyclability in our products. Therefore, several of our products are made of both recycled cotton and foam.

All products in our range are carefully selected with respect for our environment and production form. The rule applies to new and old products. We are constantly working towards making our production and products environmentally friendly.

The entire product range is designed in Denmark. The products are produced in Europe and manufactured under applicable rules. Some of our suppliers are self-sufficient with solar and wind energy.
